LUCAS MATHEUS

Game Developer • Unity (C#) • Gameplay • Multiplayer • UI/UX

lucasmatheus.monteiro8@gmail.com | João Pessoa, PB — Brazil | GitHub | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Game developer passionate about games, currently at Fun Mage Studio (Singapore) working with an international team, with experience in Unity (C#) and Unreal Engine across gameplay systems, game architecture, and networked multiplayer. I have worked on hack and slash projects, real-time multiplayer games using Netcode for GameObjects, Unity Relay, and Unity Lobby, crafting systems, merge mechanics, and isometric worlds. I also handle the interface layer and player experience (UI/UX), with attention to usability, animations, visual feedback, and accessibility.

PROFESSIONAL EXPERIENCE

Game Developer

Apr 2024 – Present

Fun Mage Studio Private Limited • Singapore (international remote work)

- Remote work for an international studio based in Singapore, communicating in English with the team
- Developed gameplay systems, mechanics, and architecture for mobile and desktop games in Unity (C#)
- Real-time multiplayer games using Netcode for GameObjects, Unity Relay, and Unity Lobby: networked gameplay, session management, and player synchronization
- Projects across different styles: hack and slash combat, crafting systems, merge mechanics, and isometric worlds
- Performance optimization for iOS and Android, including memory management and frame-rate stability
- Design and implementation of game interfaces focused on usability, visual clarity, and player experience (UI/UX)
- UI animations and visual feedback for player actions, making interaction clearer and more responsive
- Responsive, accessible interfaces, applying a front-end background and Figma to game screen design
- Modular, maintainable C# code following SOLID principles and sound architecture practices
- Collaboration with design and art teams to deliver features in an agile workflow

Front-End Developer (Vue.js / TypeScript)

Feb 2024 – May 2024

ProConph • João Pessoa, PB

- Developed frontend features with Vue.js and TypeScript, integrating REST APIs
- Built a foundation in software architecture, code organization, and business rules, now applied to game architecture
- Experience with UI/UX, animations, and user interactions, now applied to game interfaces and visual feedback

TECHNICAL SKILLS

Game Development: Unity · Unreal Engine · C# · Gameplay Systems · Game Architecture · Mobile Optimization (iOS/Android)

Multiplayer: Netcode for GameObjects · Unity Relay · Unity Lobby · Network Synchronization · Session Management

UI/UX: Figma · Interface Design · UI Animations · Visual Feedback · User Interactions · Responsive & Accessible Interfaces · Usability

Tools & Practices: Git · GitHub · Agile / Scrum · SOLID Principles

EDUCATION

Bachelor's Degree in Computer Science

2017 – 2022

Laureate Education, Inc. • João Pessoa, PB

LANGUAGES

Portuguese: Native

English: Intermediate (professional use in an international team)
